

About Us

Personal Enrichment through Mental Health Services (PEMHS) has been committed to providing care in crisis since 1981. Our dedicated staff, and comprehensive range of programs are designed to meet the needs of children, adults and families with the goal of building strong communities. PEMHS is a private, non-profit behavioral health care organization located in Pinellas County, Florida. Programs include a 24-hour suicide hotline, emergency screening and crisis intervention services, inpatient services for adults and children, residential services for children and community based programs. We understand that high quality services are necessary to obtain the best outcome for individuals and families facing behavioral health issues. PEMHS is licensed by the Florida Department of Children and Families and by the Florida Agency for Health Care Administration. PEMHS is also certified by the American Association of Suicidology and is accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF).

The Client completes a self-sufficiency matrix with their System Coordinator, and together develops an individualized Support Care Plan, identifying and prioritizing the most pressing barriers preventing the client's stability. The System Coordinator then works collaboratively with the client and any identified support system to educate on and link to community services, resources, and supports, to alleviate the identified needs and barriers.

How do we provide service?

Front line direct care staff, System Coordinators, are empowered to utilize and access Pinellas County resources on a client by client basis; all services are individual in scope, and reflect the uniqueness of each client and their presenting circumstances.

The service duration of Service Coordination is brief, generally up to 6 months. Linkages to community resources, services with increased community resource knowledge, and successful sustainability on behalf of the clients served.

Discharge Planning

Following the System Coordination Services, and achievement of the developed goals, a discharge plan will be implemented by the System Coordinator. Discharge planning begins at intake. The length of System Coordination services is dependent on the entering needs of the Client; all services are brief and intense in scope.

Who we are and what we do:

PINELLAS INTEGRATED CARE TEAM (PIC) provides System Coordination Services for individuals with complex needs, following the Pinellas County Sheriff's Office screening and referral to PIC Team. Pic Team is a collaborative effort of the following agencies: Personal Enrichment through Mental Health Services, Inc (PEMHS), Suncoast Center for Community Mental Health and Baycare, Inc.

PIC is a prevention initiative focusing on providing clients the right service, at the right time, for the right need. The initiative provides support and wrap-around services to meet the client's basic needs, and helps to empower them to become self sufficient.

The goal of PIC services is to provide quality care, and support during a time of need. The focus is to assist the Client in reducing barriers they may face, in an intensive wrap around model; to help achieve overall strengthened sustainability.
